## CASTROL PRODUCT VT 533

Semi synthetic oil for gob distributor e scoop

### Technical properties

#### Description

Product semi synthetic with mineral oil base and ester synthetic.

#### Use & advantages

Product studied for gob distributor & scoop. The chemist composition let to have drastic reduce of forming of residual coming from process of thermal degradation cause of high temperature into contact area between product and melt glass.

The presence of particular additives let to increase the lubrication property too.

**Product VT 533** obtains the decrease of consumption and increase the lubrication time.

**Product VT 533** has specific inhibitor that gives suitable to use in presence of nonferrous metal as well as aluminum and yellow alloy.

#### Application

The product is use by central lubrication system with final nebulization.

TECHNICAL PROPERTIES	
Aspect	Liquid clear slight amber
Viscosity @ 40°C	27 cSt

Product has to be stocked at temperatures between -5 and 40°C  
Stocking duration: six months.
